Healthy Juice Concentrates for All Kids to Enjoy

We provide a variety of flavors that all kids can enjoy! All the juice concentrates that we sell are compliant with the USDA guidelines and all of the requirements for CACFP, subsidy, and nutrition set forth by the FDA. You don't need to refrigerate the concentrates before or after opening them.

If you're running a childcare center and want to serve healthy beverages to kids every day, order quality juice concentrates from Penny Juice of America.

iPhone 8 - 1

1 Header

Use 3 equal divs to create the hamburger menu. Use the Penny Juice image from the original website as the title of the page.

2 Hamburger Menu

Clicking on the hamburger menu will yield a dropdown with the sections from the navigation bar. Use an unordered list of flex items to display one section under another. Use a hidden checkbox to toggle and untoggle the navigation bar.

3 Cover Image

Set this image as a background image so that the text and button can put placed on top of it. Increase the darkness and the opacity of the image so that the text above it is clearly visible.

4 Button

Use a button tag to create a button and set the appropriate padding.

5 Main Section

For this main section, use a grid such that each section, such as "Rainbows of Exciting Flavors," and its content (an HTML paragraph, button, and image) takes up 1 row. Be sure to use a justify-items: center in the CSS so that each image is centered on the page.

6 Section Break

For this section break, use a div with appropriate padding to create the blue background, and a flexbox with flex-direction: column and align-items: center to most easily horizontally center the two lines of text.

7 Socials Section

For this section, use another flexbox with flex-direction: column to have each section (i.e. Contact Us, Our Facebook Feed, etc.) take up one row.

8 Facebook (and Twitter) logos

Position the Facebook and twitter logos next to the section headers absolutely with position: absolute.
