Healthy Juice Concentrates for All Kids to Enjoy

We provide a variety of flavors that all kids can enjoy! All the juice concentrates that we sell are compliant with the USDA guidelines and all of the requirements for CACFP, subsidy, and nutrition set forth by the FDA. You don't need to refrigerate the concentrates before or after opening them.

If you're running a childcare center and want to serve healthy beverages to kids every day, order quality juice concentrates from Penny Juice of America.

Annotations

1 Header

Use a grid to appropriately place the items as seen in the header. Use a very thin 2nd row to place the "It makes sense" motto. Add padding to the header to create the appropriate height for the navigation bar.

2 Hovering over Navbar Items

Hoving over any of the navbar items will produce a black horizontal line over it, to give a user a clearer idea of what section they are hovering over.

3 Cover Image

Set this image as a background image so that the text and button can put placed on top of it. Increase the darkness and the opacity of the image so that the text above it is clearly visible.

4 Main Section

For this section, use a grid with grid-template-columns: 1fr 1fr. A section header and the paragraph and button below it make up one grid item, and an image is another. Use the grid-column attribute on each grid item to place each component in the correct position.

5 Changing Image Sizes

The sizes of the images in this section will likely have to change with the width of the screen.

6 Section Break

For this section break, use a flexbox with flex-direction: row to have both sections of text appear on the same line. Be sure to use align-items: center to center the text vertically relative to the blue rectangular strip. Use a div with appropriate padding to create the blue background.

7 Socials Section

Use a flexbox with flex-direction row to place each section in its own column. Use justify-content to space each flex item evenly.

8 Contact Information

Use a series of spans with display: block to get each piece of information to show on a new line.

9 Facebook and Twitter Logos

Position the Facebook and twitter logos next to the section headers absolutely with position: absolute.
